

Beware the environmental movement, beware the environmental movement

Let's clarify a few things before anybody starts with the usual I'm for "Big Oil" or some kind of anti-environment rich white male capitalist rant or whatever the latest catch phrase of the (ROCKEFELLER funded) fringe eco wacko left is.

A. I am not "anti-environment". There are legitimate environmental problems like solid waste disposal, sewage and water treatment and local air pollution issues like LA's recurring smog problems. Wetlands serve important environmental functions but now, like everything else with the eco wacko movement, it has gone too far and protecting them has become a blank check for total control of private property. Actually, my collegiate background is civil engineering with an environmental concentration. In fact, the solution to all of today's real environmental problems can be solved with things like chemistry, microbiology, fluid mechanics, thermodynamics, etc. etc. and the resultant technologies of a free, capitalistic society. For example, we invented nuclear power in this country. In one case in Arizona three nuclear plants for cooling water are using purified wastewater from nearby sewage treatment plants. By the way, seven more nuclear power plants were due to come on line there but thanks to the eco wacko kooks and our "useless officials" in Congress, "hasta la vista baby" to quote Republican turned green loon Governor Arnold of the loon state of California. Speaking of California, wastewater treatment plants there now can produce potable quality water as a discharge. Hmmm. We can go to Africa and take their CFCs but not build water treatment plants. I can go on but you get the point. Now when one reads the books of the "New" Age Mother Earth Gaia wackos and associated (and very religious) "New" Age loons a few things become abundantly clear as thoroughly documented in "The THEorY of LIVEvolution" and summarized here:

1. The eco wackos regard pesky things like chemistry, physics and other sciences of the devout Christian Isaac Newton as "mechanistic" and "profane". Alchemy, the forerunner of real chemistry, is purely metaphysical in nature and the "Sacred Science" according to these (very religious) fools.
2. In order to be valid a scientific THEORY must be verifiable and backed by DATA. This holds for ALL branches of science. Personally, I have studied copious models in the fields of hydrology and water pollution. These models need to be field tested (i.e., reality verified) before being released for general consumption by SCIENTISTS and ENGINEERS and even then they are only as good as the operator, his or her data collection, etc, etc. Yet the "models" predicting "Global Warming" need no such verification and in fact the SCIENTIFIC data CONTRADICTS "Global Warming" (suddenly "Climate Change"). The goofballs like Hollywood elites and a certain (very financially) green private jet flying limo driving hypocrite not to mention the (Banksta owned) mainstream snews have exempted themselves from this INCONVENIENT TRUTH. This fiasco is thoroughly documented in "The THEorY of LIVEvolution" that itself has somehow escaped the need to

produce even one iota of verification or DATA like say an evolutionary transitional fossil...

3. As documented in “The THEorY of LIVEvolution” the real goal of the kook fringe (and ROCKEFELLER funded) eco wacko movement is POPULATION CONTROL. Is this “crazy”? There are millions of dead innocent Africans that speak otherwise from the other side of the grave. For example, the ozone hole “scare” scam disallowed cheap and efficient refrigeration of life saving medicines, the Global Warming (Climate Change?) “scare” scam in addition to wasting billions of dollars and endless scientific minds to solve a non-existent problem is literally starving people to death worldwide with this ethanol hoax. The pesticide DDT was also banned by the eco wacko kooks and now mosquitoes can live and people die of malaria. That’s okay, we all come from the same “Earth Mother” according to these loons not mention the THEorY of LIVEvolution fools who would claim that they probably deserved it due to some past life bad karma...
4. Finally, more shame (if that’s possible) to the disgraceful Catholic Church and other Social Gospel fools for joining in with this sham. Now if mankind can destroy himself with “global warming” aren’t we really calling God, the real One, an idiot since we are claiming one of His creations can destroy another? Of course there’s the prospect of nuclear war but Mother Earth would recover over time. Besides, before that God would need to intervene to save us from ourselves unless we think the all too humanistic (ROCKEFELLER founded) UN-dead is up to the task....

B. BEWARE THE ENVIRONMENTAL MOVEMENT, BEWARE THE ENVIRONMENTAL MOVEMENT to paraphrase Anti-Commandment number 10 of the Georgia Guidestones “...leave room for nature, leave room for nature”. According to the UN-dead “global warming” is now a “security issue” as in martial law issue. Hmmm. In addition to the aforementioned beyond evil conclusions, the leader of the UN-dead associated and eco wacko laden “Green Cross” is none other than ex “Evil Empire”, devout Communist and ex KGB leader Mikhail Gorbachev. Now when Gorby here converses with current Russian, very proud, Communist (and ex-KGB chief) Russian leader Vladimir Putin do you think they are remorsefully discussing the real environmental debacle of Chernobyl or the Western economy weakening eco wacko movement as they bide their time to bring back “Mother Russia” not to mention new alliances with environmentally friendly Iran (we will destroy Israel), Libya, Syria and the other lunatics from the “religion of peace”?

In a nutshell, no pun intended, we have hiding beneath the environmental movement the makings of the One World Control System as justified by the global warming (climate change?) “Crisis” in addition to the makings of the Battle of Gog and Magog (who?) that some say IS the Battle of Armageddon. Both happen to show up in the Book of Revelation and now both hide beneath the cover of the radical environmental movement.

Finally, can I get some love for poor David Rockefeller? His Banksta forerunners knew they were playing with fire by unloosening the likes of Stalin, Mao, Hitler and the other champions of the Population Control/Mother Earth saving types. I know David

cares very much for our environment as documented in “The THEorY of LIVEvolution” and his quotes about Communist China’s contributions to the Mother Earth saving population control endeavor. But this Vladimir Putin may not roll over and play “nice” like say Joe Stalin or Nikita Khrushchev. Now it seems Davie (and his buddies like Hank Kissinger, Zbigniew Brzezinski and Ted Turner) may have a real problem on his hands trying to control the current crop of Mother Russia’s leaders not to mention the “religion of peace” types we will die for Allah nut-cases...

Oh yeah, I almost forgot, silly me. How can I forget the very (financially) green Al Gore...eco wacko tool of the Bankstas. If there’s any doubt that the Bankstas own “both” sides of the “Presidential” selection scam look no further than this hypocrite charlatan. The “imbecile majority” actually thought things would be different had he won in 2000. Fine. So instead of Skull and Bones Bush nailing us with the “Federal” “Reserve” Banksta approach this clown would have nailed us with the pro-eco wacko Banksta approach. (Hint: Both are happening anyway). His “global warming” (climate change?) and ozone hole scam are covered thoroughly in “The THEorY of LIVEvolution” but one fact should be stressed here in case anyone thinks I’m the crazy one for calling the eco wackos a bunch of Earth spirit worshipping loons. Al (I buy carbon credits from my own carbon credits company) Gore refused to take this “Personal Ethics Energy Pledge” in front of the United States Senate Public Works Committee on March 21, 2007:

As a believer:

That human-caused global warming is a moral, ethical and **spiritual** issue affecting our survival;

That home energy use is a key component of overall energy use;

That reducing my fossil fuel-based home energy usage will lead to lower greenhouse gas emissions; and

That leaders on moral issues should lead by example;

I pledge to consume no more energy for my use in my residence than the average American household by March 21, 2008

(emphasis mine)

Hmmm. Al “the debate is over” Gore probably didn’t take this pledge because he really does believe that global warming should stand the test of scientific scrutiny with pesky things like data confirmation of “global warming” (climate change?) theories and not be considered some kind of “spiritual” issue like say the other Gaia earth spirit weirdoes. On the other hand maybe he really doesn’t want to give up that private jet or house that uses around 20 times the energy of your typical evil limited resource depleting American household while he pays for the whole charade by buying “carbon credits” from a company he has an ownership interest in...

Ummm....
